Response to additional questions regarding the RFP GHSC-TA-TOGO-001:

1. **What is the warehouse space required in square meter?**

Based on the RFP, required space or volume will depend on incoming shipments. Chemonics does not anticipate renting a warehouse but is rather looking for space/volume depending on the shipment volume and replenishment frequency. The potential bidders should describe the space/volume availability they may anticipate based on their routine operations (inbound/outbound).

An illustrative description of potential shipments includes:

a. 50,000 bottles of Tenofovir/lamividune/dolutegravir 30 tablets

b. 45,000 bottles of Tenofovir/lamividune/dolutegravir 90 tablets

c. 5000 HIV rapid tests kits (Determine, kit of 100 pieces)

d. 800 HIV rapid tests kits (First Response, kit of 30 pieces)

These numbers are subject to changes anytime and the shipment volume will depend on procurement agent's consolidation process.

2. **Annex 6 WHO Good Distribution Practices for Pharmaceutical Products is missing in the document.**

Missing Annex 6 has been attached to the amended RFP. It includes WHO Good Distribution Practices for Pharmaceutical Products and WHO Guide to Good Storage Practices for Pharmaceuticals.
